

Weekly Data Snapshot

KANSAS CITY REGION | COVID-19 RESPONSE

Published on Mar 26, 2021. See footnote* for the data's timeframe.

KEY DATA POINTS

137.0 New Cases/Day

1,934.4 Average Tests/Day

7.1% % Positive Tests

2.7 New Deaths/Day

*Seven-day rolling average

WHAT YOU CAN DO

Wear a face mask

Practice social distancing

Wash hands often

Frequently clean surfaces

Stay home if you are sick

[Vaccine information](#)

[Volunteer opportunities](#)

The Kansas City region's COVID-19 data continues to show signs of improvement, but concerns remain about low numbers of tests. The region's testing rate remains below the Centers for Disease Control and Prevention's standard of 3,150 tests per day, which limits our understanding of disease prevalence and transmission in the community. Public health experts are also monitoring increases in new cases in 19 other states.

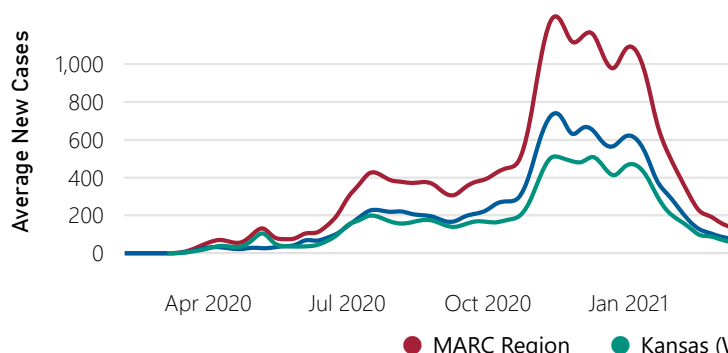

- Average hospitalizations related to the virus are **decreasing**.
- Daily new cases and deaths have **decreased**.
- Contact tracers and disease investigators have **caught up**.
- Labs are returning test results in **2 to 3 days**.

The **Kansas City Region COVID-19 Data Hub** now has a [vaccinations page](#) that displays data from the state of Kansas and Missouri websites. Visit and share your feedback at covidhub@marc.org.

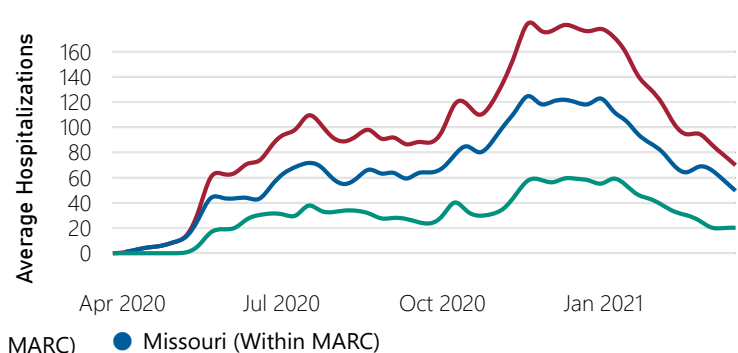

Looking for more on the **COVID-19 vaccine**? Visit the [vaccine page](#) on PrepareMetroKC.org for links to interest surveys and information about eligibility. If you've been vaccinated, remember to still protect yourself and others by wearing a mask, staying 6 feet apart from others, and avoiding crowds and poorly ventilated spaces.

Key Graphs

CASES | Seven-day rolling average

COVID-19 HOSPITALIZATIONS | Seven-day rolling average

*The trends lines and data points shown here represent validated data, which requires a 10-day lag for cases, deaths and tests (Mar. 5-11, 2021); and a 2-day lag for hospitalization data (Mar. 13-19, 2021). To see more recent, unvalidated data, please visit the Kansas City Region COVID-19 Data Hub at <https://marc2.org/covidhub/>.

NOTE: The data in this summary pulls from multiple sources and what is believed to be the best, most current available data. However, because information and strategies are changing quickly and data sources are updated at different intervals, the information presented may not always be comprehensive. Please email marcinfo@marc.org with questions, corrections or input.
